

Solution Requirements

Date	04 July 2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	User accesses the Smart Lender web application securely.	High
2	Authorization levels	Applicant can enter loan details and view prediction results.	Medium

3	External interfaces	System interacts with Flask, Random Forest model and HTML pages.	High
4	Transactions processing	System processes applicant details and predicts loan approval.	High
5	Reporting	System displays loan approval or rejection result instantly.	High
6	Business rules, etc.	Prediction is based on applicant details using Random Forest.	High
7	Compliance to laws or regulations	Applicant data is used only for loan prediction and kept confidential.	Medium
8	<i>Other</i>	System provides a simple and user-friendly interface.	Medium

--	--	--	--

Step 2: Non-Functional Requirements (NFR)

1	Performance & Speed	Predict loan eligibility quickly.	Response within 2 seconds
2	Scalability	Support multiple loan prediction requests.	Handles multiple users
3	Security & Data Privacy	Protect applicant information securely.	No unauthorized data access
4	Reliability & Availability	Provide consistent prediction service	99% availability

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
-------------	---------------------	--------------------------------	--

5	Usability & Accessibility	Easy-to-use web interface.	Simple navigation and forms
6	<i>Other</i>	Easy maintenance and future model updates.	Supports model replacement
