

Project Executable Files

Date	10 July 2026
Team ID	xxxxxx
Project Name	Smart Lender
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	No
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	Yes
9	Test files and test results	Yes

10	Demo video or walkthrough (if required)	Yes
----	---	-----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Smart-Lender/

```

|
|— models/
|   |— model.pkl
|   |— scaler.pkl
|
|— templates/
|   |— home.html
|   |— predict.html
|   |— submit.html
|
|— static/
|   |— css/
|   |— images/
|
|— dataset/
|   |— loan_data.csv
|
|— app.py
|— requirements.txt
|— Dockerfile
|— README.md
|— .gitignore
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed (Local Flask Application)
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	Docker (Local Deployment)

Repository Link	https://github.com/manaswitha13/Smart-lender
Demo Video Link	https://drive.google.com/file/d/1iLV2iIOX8hAvlu98XN-vGWyRa17rMvES/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites

- Python 3.10 or above
- Flask
- Scikit-learn
- NumPy
- Joblib
- Docker (optional)

Steps

Step 1: Clone the repository.

```
git clone <repository_link>
```

Step 2: Install dependencies.

```
pip install -r requirements.txt
```

Step 3: Navigate to the project folder.

```
cd Smart-Lender
```

Step 4: Run the Flask application.

```
python app.py
```

Step 5: Open your browser.

```
http://127.0.0.1:7860
```

Step 6: Enter applicant details and click **Predict** to view the loan approval result.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on training dataset quality.	Improved using Random Forest model
2	No user authentication module.	Can be added in future versions.
3	Application runs locally unless deployed.	Can be deployed using Docker or cloud hosting.
