

Scalability & Future Plan

Date	13 July 2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Uses a limited training dataset	May reduce prediction accuracy for unseen data	High
2	No user authentication or login system	Anyone can access the application	Medium
3	Runs locally and is not cloud deployed	Limited accessibility for users	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited users on local system	Deploy on cloud with load balancing
2	Data Storage	Uses static dataset and model files	Integrate SQL/NoSQL database for dynamic data
3	Performance	Good for small-scale predictions	Optimize model and enable GPU/cloud resources
4	Security	Basic Flask application	Add user authentication, HTTPS, and data encryption

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 1	Deploy application on cloud (Render/AWS/Azure)	2 Months	Improved accessibility and availability
Phase 2	Add user login and authentication	1 Month	Improved security and personalized access
Phase 3	Integrate database for storing applications	4 Months	Better data management and application tracking
Phase 4	Improve the ML model using larger datasets and advanced algorithms	6 Months	Higher prediction accuracy and better reliability
